## Introduction:

We have created Illinois Tech Sporting Goods website. It is the retailer website where the user can purchase the sporting goods for various products. We have made the retailer website for sports such as Baseball, Basketball, Soccer, Football, and other sports. There is a manager who can add, update or delete products. We also have the functionality of multiple retailer who can register themselves and can put their products for sale on the website. The manager needs to approve every retailer post registration. Once approved, the retailer can add/update/delete their products on website. The user can Sign up through Facebook or can manually register himself. Once the user is registered he can proceed to purchase the products.

We have implemented 5 important features in this project.

1. Implemented Servlets.
2. All data is stored in MYSQL and reviews stored in MongoDB.
3. Implemented JSP and trending functionality using MYSQL and MongoDB.
4. Ajax Search and Autocomplete feature.
5. Used twitter API to match latest deals online.

## 1. The home screen of the project is shown below.

The above products are sold for Baseball sport. Similarly, we also have products for Basketball, Soccer, Football and other Sports. Please find the screenshot for their products below.

2. The user should first click on signup. He needs to fill the information in the form mentioned. Below represents the screenshot for Sign up page.

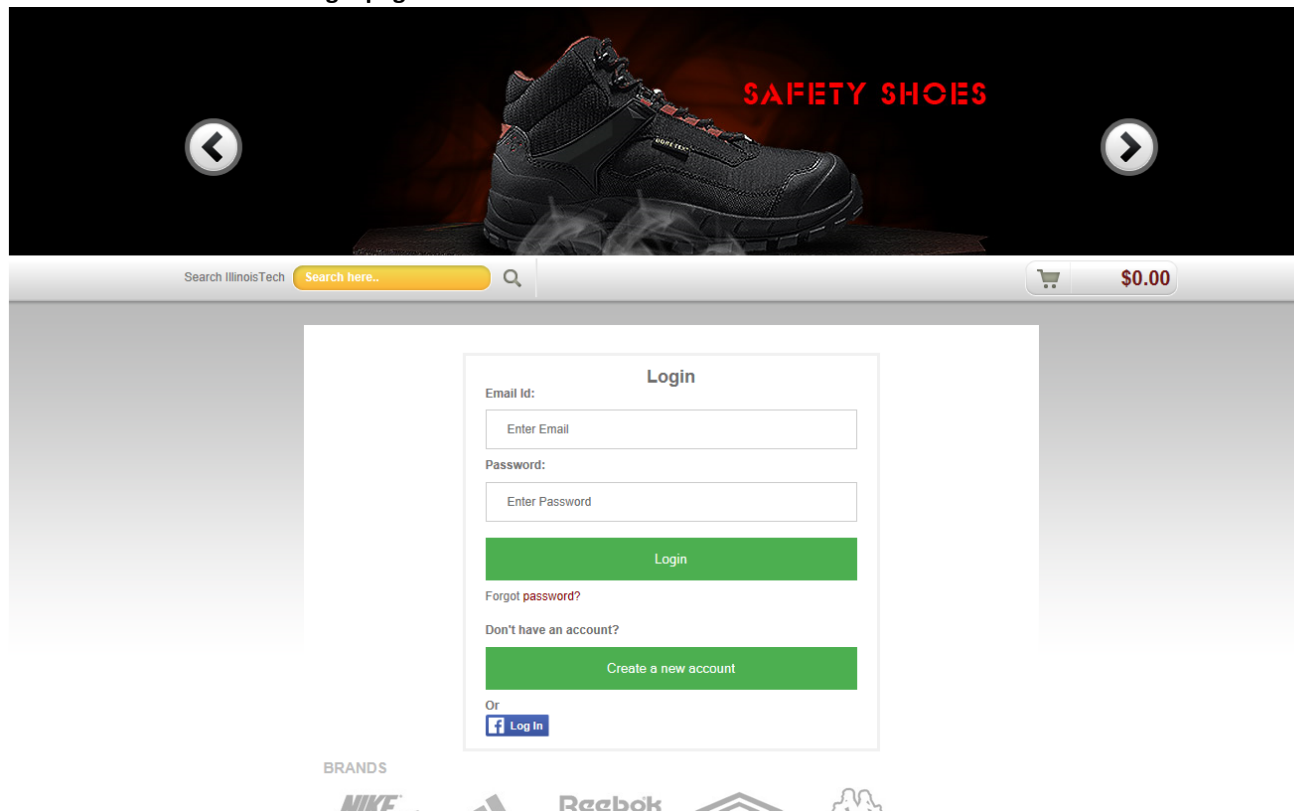

The screenshot shows a web page with a banner at the top for "SAFETY SHOES" featuring a black boot. Below the banner is a navigation bar with a search bar labeled "Search IllinoisTech" and a shopping cart icon showing "\$0.00". The main content area contains a "Sign Up" form with the following fields:

- User Name:
- Email:
- Phone number:
- Address:
- Password:
- Password:

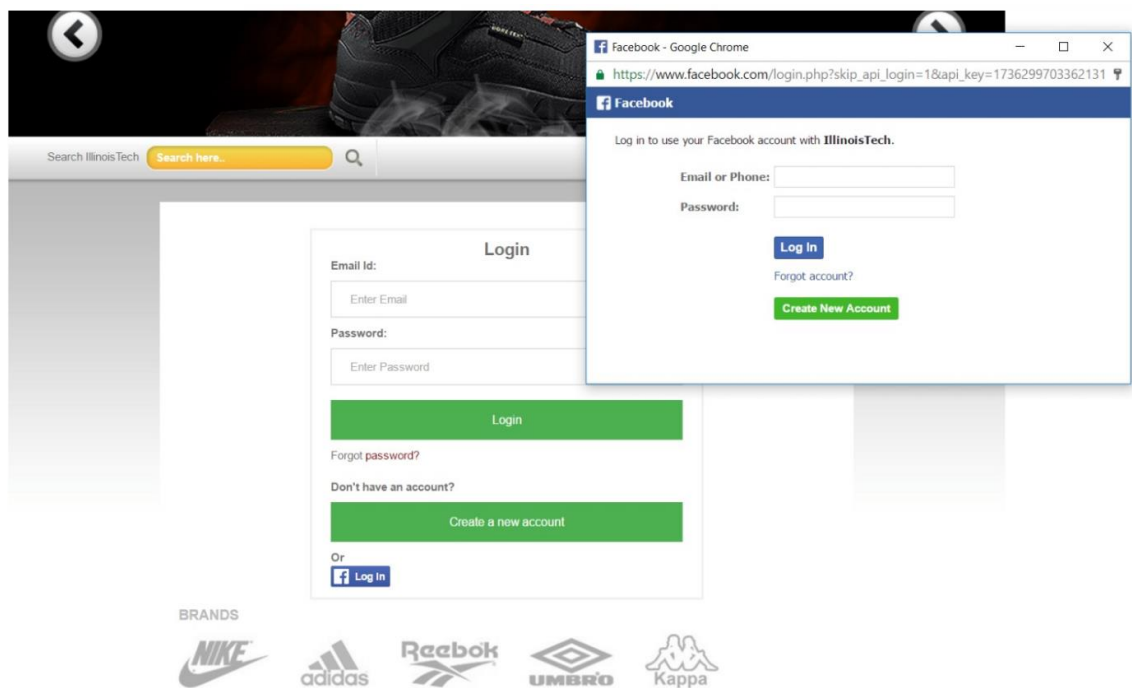

At the bottom of the form is a green button labeled "Create Account". Below the button is a link labeled "SignUp as Retailer".

The user will be successfully registered and his information will be successfully stored in the database.

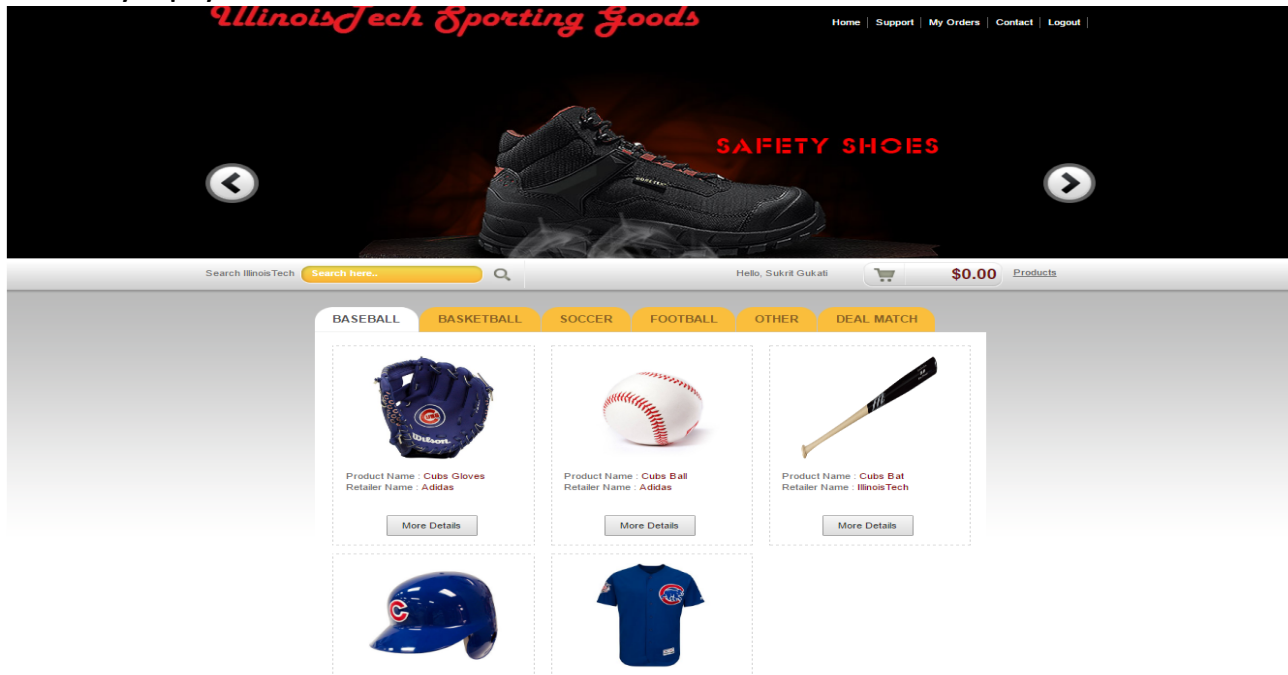

3. Below is the screenshot for Login page.

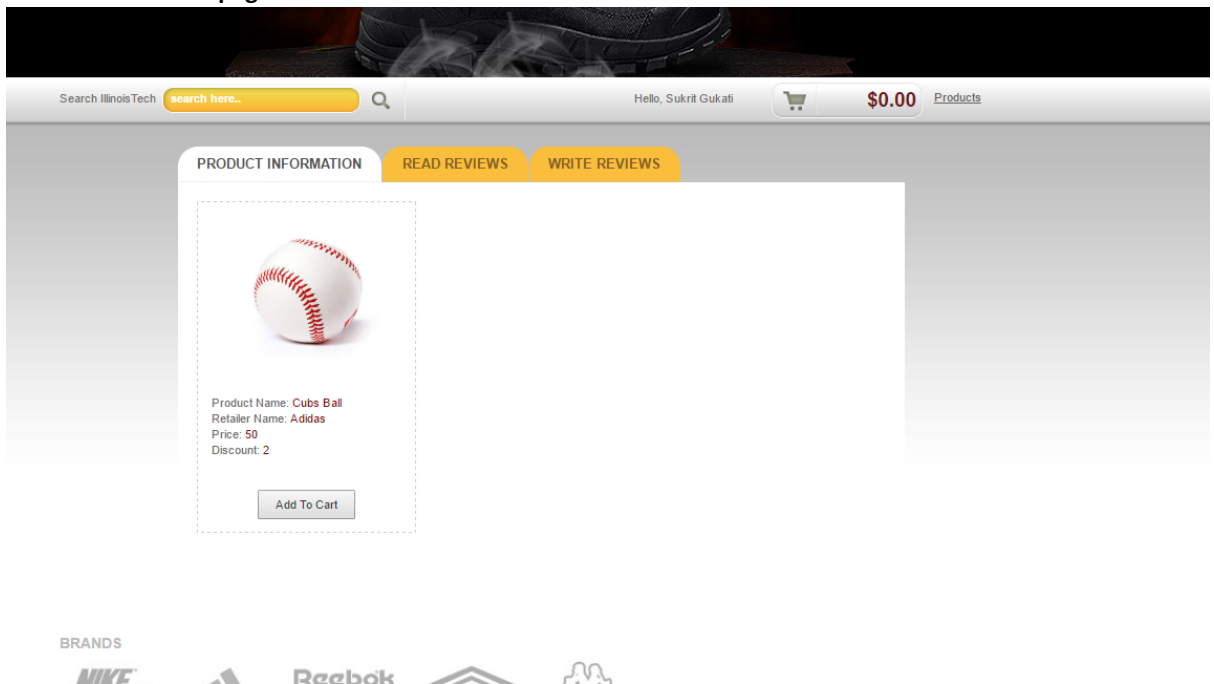

4. The User when chooses to login with FB the following page will be displayed. He needs to enter his Facebook userid and enter his Facebook password. This is shown below.

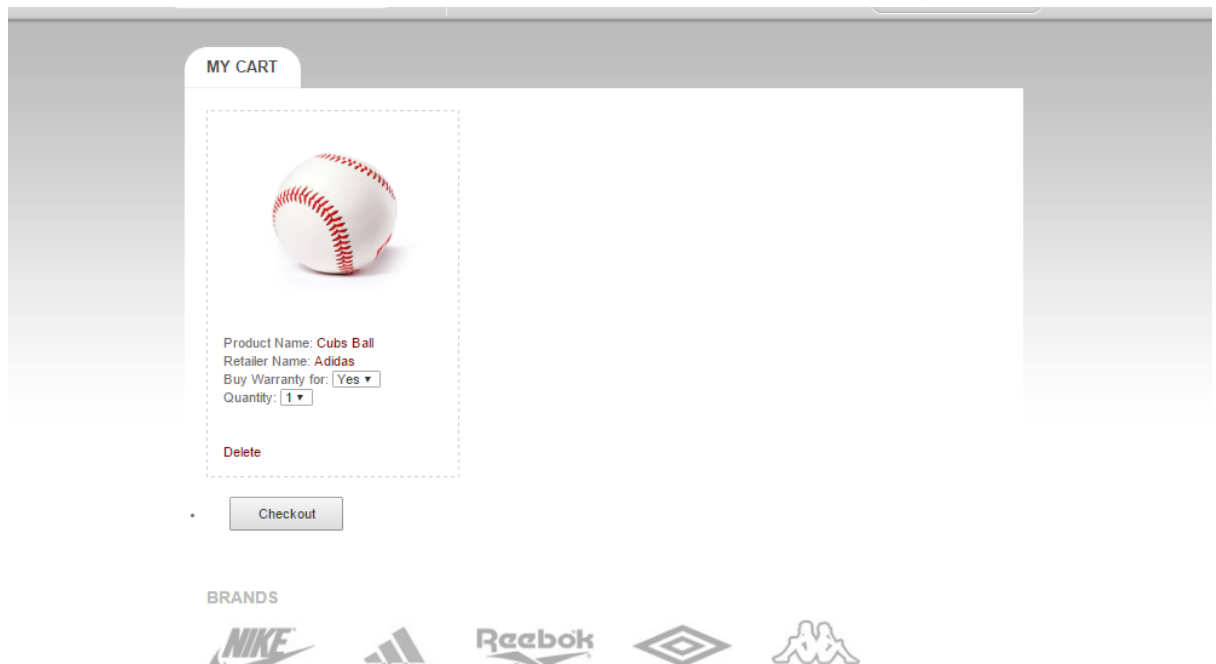

The user can click on FB Login and the user will be successfully registered via login. This is one of the additional functionality. Once successfully log in the user home page will be successfully displayed. Please find the below screenshot.

5. The user can proceed to purchase the product by clicking on more details. On this page he can view the price of the product. There is separate tab for Read Reviews and Write Reviews. Below is the screenshot for this page.

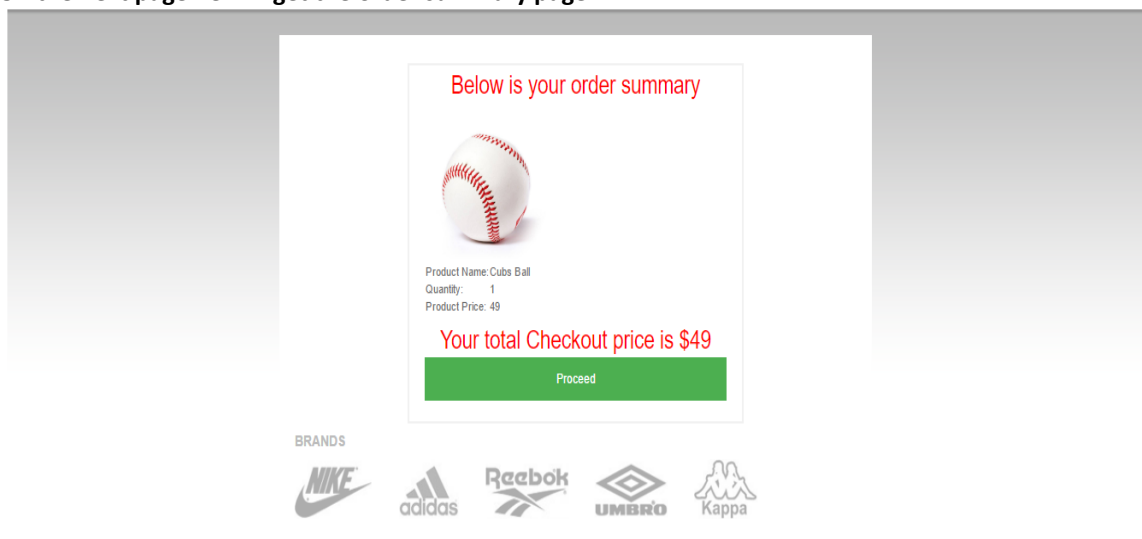

6. To add the product to the cart. He needs to click on Add To Cart. Below is the screenshot for the cart.

On this cart page the user can change the quantity or can buy warranty for this product. He can also modify the information of the cart by removing the products added by clicking on delete. To proceed to checkout he needs to click on checkout button.

7. On the next page he will get the order summary page.

The user will get the names of the products he is purchasing and the checkout price. The checkout price is calculated by taking into consideration the quantity of the product and discount applied on this product. To purchase the product he needs to click on Proceed.

8. The user needs to fill the information on the checkout page which is given below.

**Your Total Cost is \$49**

**Enter your shipping address**

Shipping Address

2851 south king drive Apt 401

**Enter Credit/Debit Card Details**

Credit Card Number

4200215263524856

CVV

525

Name on Card

Sukrit Gulati

Expiry Date(MM/YY)

07/21

**Confirm Order**

This information is stored in data base as customer order along with the products bought by this customer.

10. The user can also **WRITE REVIEW** and **READ REVIEW** for particular product. The reviews will be stored into MongoDB. Below are the screenshot for review parts.

The screenshot shows a web interface with three tabs: 'PRODUCT INFORMATION', 'READ REVIEWS', and 'WRITE REVIEWS'. The 'WRITE REVIEWS' tab is active. The form is titled 'Write Review' in red. It contains the following fields:

- Product Name: Cubs Gloves
- Product Price: 100
- Username: Sukrit Gulati
- ReviewRating (1 to 5): 4
- ReviewDate: 12-02-2016
- Review Text: Excellent Gloves
- Submit Review button

The user when clicked on Submit review it will be successfully inserted into MongoDB.

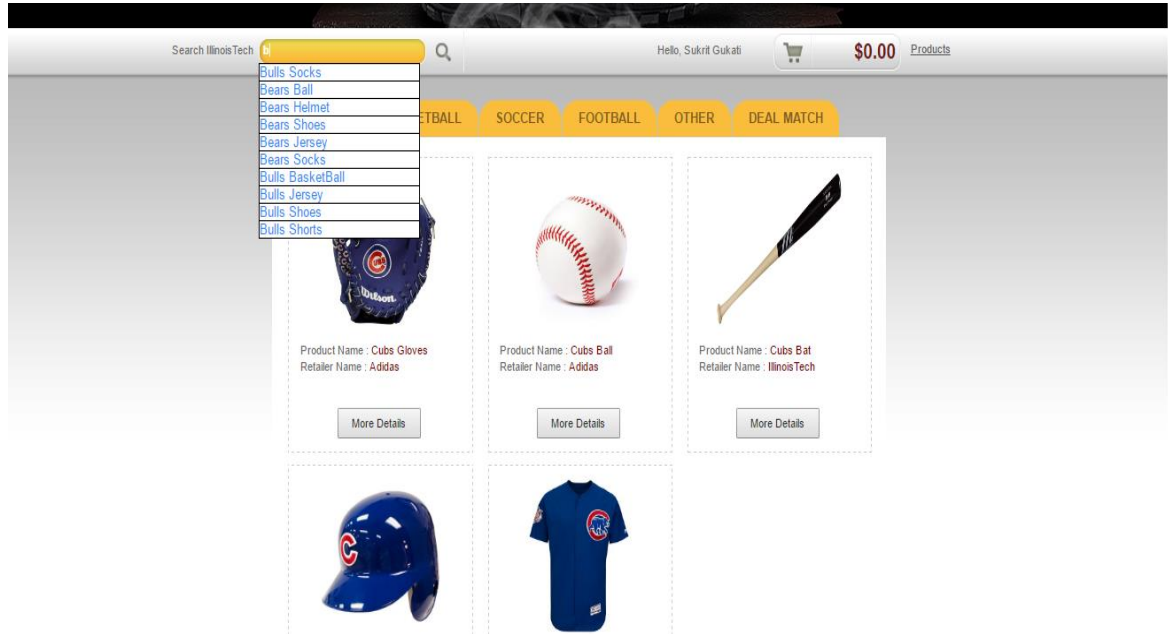

```
{ "rating" : 4, "date" : "2016-02-12", "text" : "Excellent Gloves" }
{ "_id" : ObjectId("58411818ae64281cf0bcb661"), "title" : "myReviews", "productName" : "Cubs Gloves", "productPrice" : "100", "userName" : "Sukrit Gulati", "rating" : "4", "date" : "2016-02-12", "text" : "Excellent Gloves" }
```

To Read Review click on Read Review Tab. The following page will be displayed

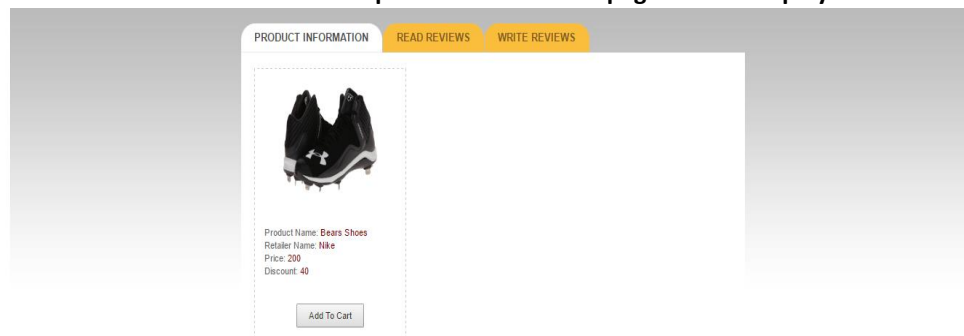

The screenshot shows the 'READ REVIEWS' tab active. The page is titled 'REVIEWS FOR: CUBS GLOVES'. It displays the following review details:

- Product Name: Cubs Gloves
- Product Price: 100
- User ID: Sukrit Gulati
- Review Rating: 4
- Review Date: 2016-02-12
- Review Text: Excellent Gloves

11. Below is the Ajax Functionality displayed.

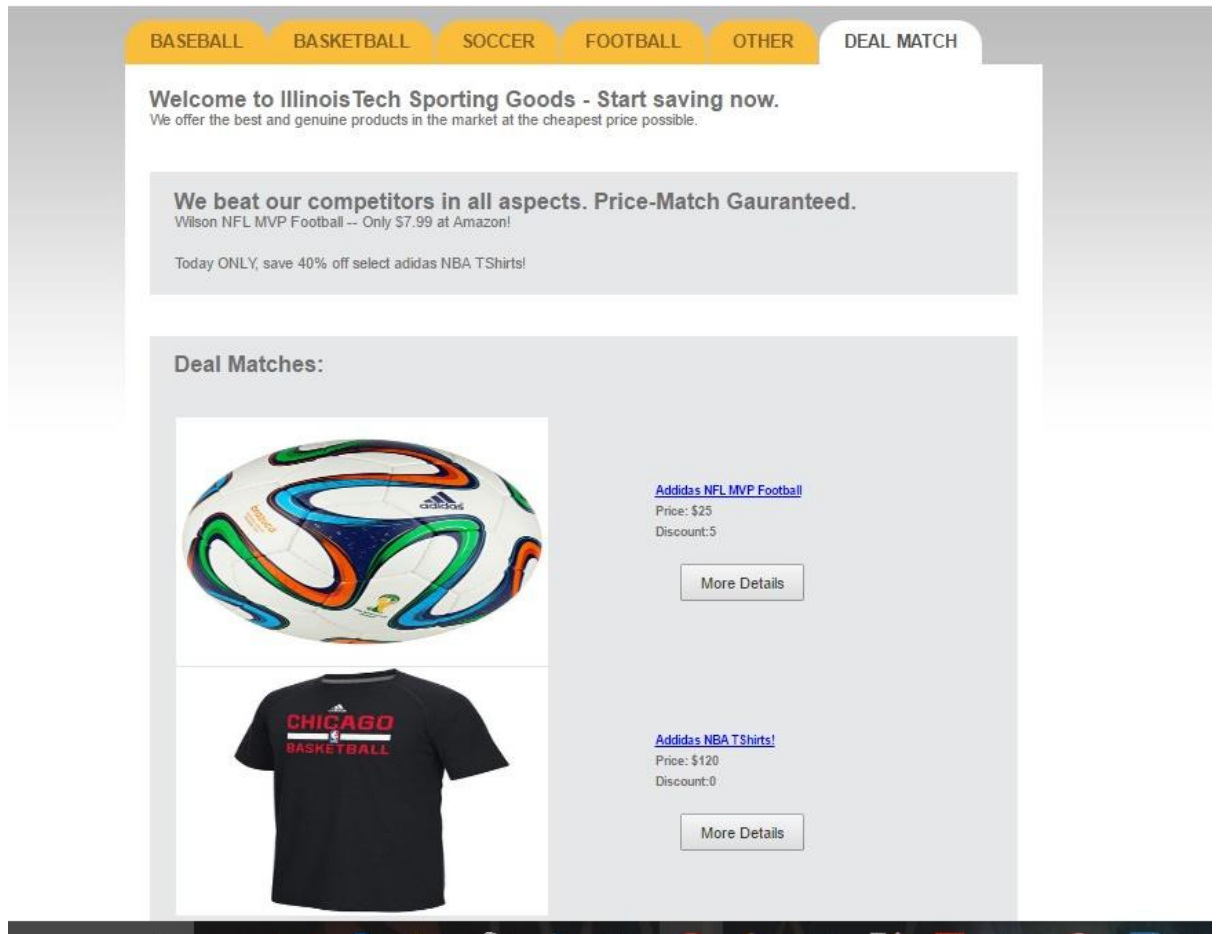

If we choose the Bears Shoes. The product information page will be displayed as below.

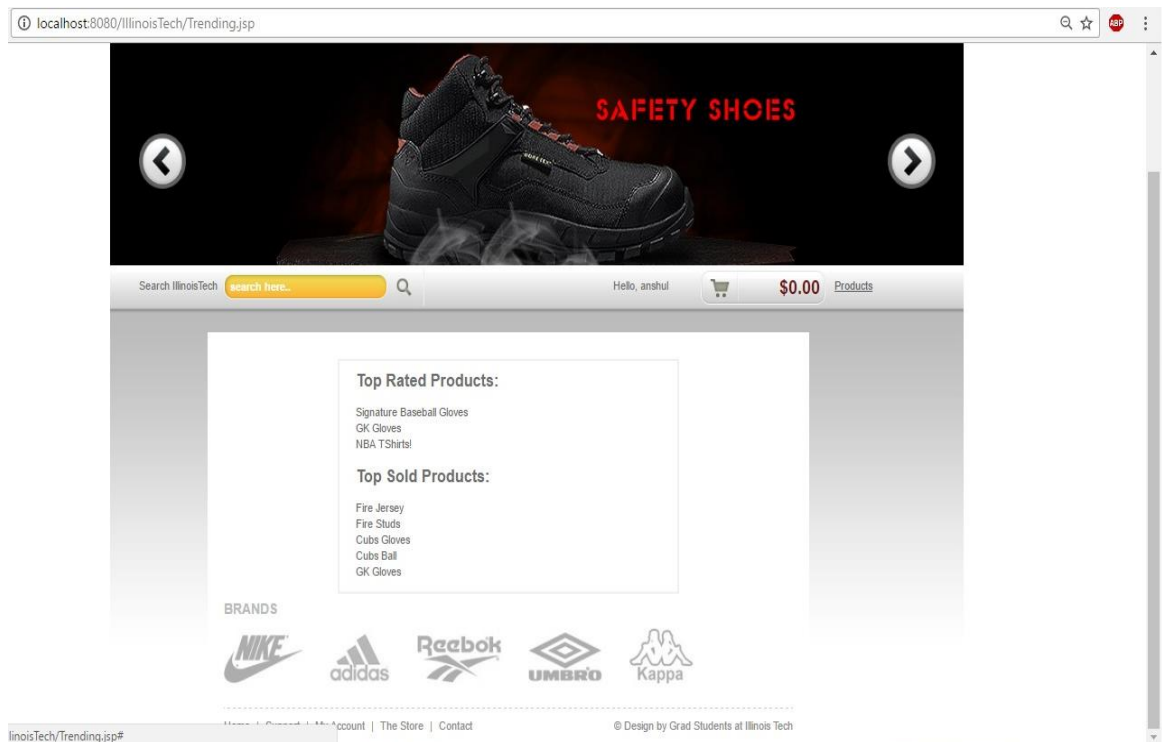

- 12. To check the functionality of deal match click on deal match tab. The following information will be displayed. The products in the database are matched with the deals found online using twitter API. Below is the screenshot for DEAL MATCH.**

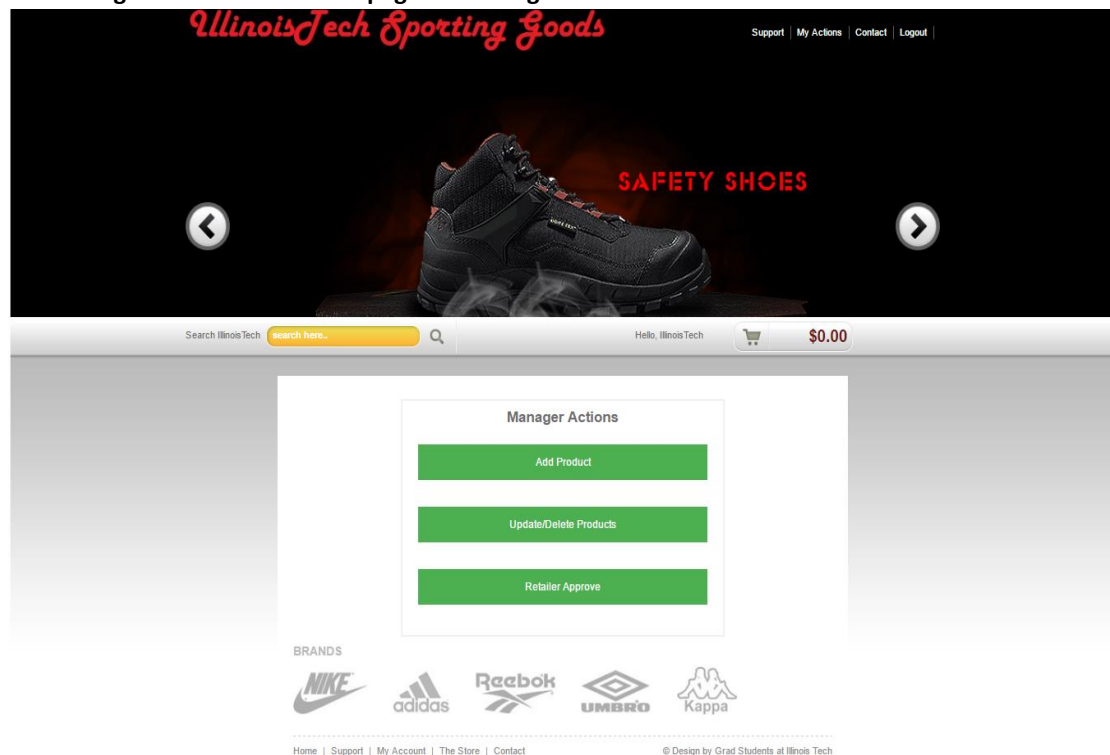

13. We have also implemented the functionality of Trending.

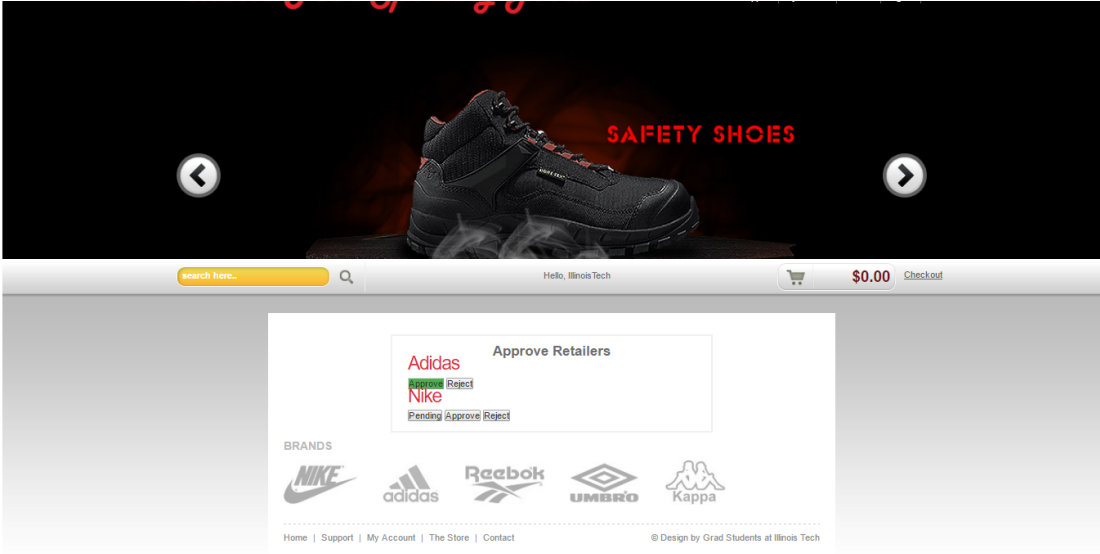

In trending section we have found the top rated products depending on the ratings for the products using MongoDB. To find the top sold products we used MYSQL depending on the number of products sold.

14. To login as the manager, the manager should login using the email id and password provided for the manager. Below is the homepage for manager

The manager can Add Product, Update/Delete Product and Approve recently registered retailers.

Initially the Manager will have to choose between Approve or reject for the retailer. If the retailers is approved then he can sell his own products in the website. If the manager choses to reject the retailer then all the functionality of the retailer will be revoked.

15. To signup as the retailer he should click on 'SIGNUP as RETAILER' on the Signup page. The signup page will be displayed and he needs to enter his information as shown below.

**Retailer Sign Up**
